"The Ciphaler device is an indigenously developed, breath-actuated, multi-dose (discrete), dry powder inhaler (DPI) device with an in-built dose counter. Errors in inhaler device usage are common among patients, leading to inadequate asthma and COPD control, poor disease outcomes and higher healthcare costs. The Ciphaler device has been designed to reduce errors in the inhaler technique, by making it easier for patients to use, which can enhance patient preference for the device. Further, the dose-counter in the Ciphaler counts each dose and displays the number of doses remaining in the Ciphaler, and the last five doses are displayed in red indicating that the patient needs to arrange for a new inhaler. This helps the patient to keep a track of the number of doses remaining in the inhaler and avoids running out of the medication, which is especially important for medications like budesonide/formoterol which are used during emergency for acute attacks. Importantly, the dose counter will also help clinicians understand the adherence of patients to therapy, which is a crucial aspect in asthma management.

Further, it is imperative to note that the Ciphaler device has been comprehensively evaluated in two robust studies conducted in Indian patients.

The first study which compared the Ciphaler with a unit-dose dry powder inhaler (DPI) showed that a higher proportion of patients could use the Ciphaler correctly as compared to the unit-dose DPI. Importantly, fewer patients made critical errors with Ciphaler as compared to the unit-dose DPI as well. Significantly lesser number of training sessions and lesser training time were needed for the Ciphaler and a higher percentage of patients found Ciphaler easier to use and carry. Also, a higher percentage of patients were very confident of using Ciphaler, including during an acute attack, as compared to the unit-dose DPI.

The second study evaluated the efficacy and safety of formoterol/budesonide delivered via Ciphaler in patients with asthma over 12 weeks. All the patients enrolled in the study (previously taking formoterol/budesonide via a unit-dose device) had uncontrolled asthma. After patients were switched to the same combination delivered via Ciphaler, statistically significant proportion of patients showing improvement in asthma control. Also, majority of the patients found Ciphaler easy to use (90.5%) and carry (91%). Significant proportion of patients were comfortable with using the Ciphaler on the go (90%) and were confident of using the device quickly even during an acute attack (95%). Overall, 96.5% patients preferred Ciphaler over the unit-dose device for future use."

4. The Company has claimed following benefits of Ciphaler:

- Easy to learn and use device
- Reduces training time
- Similar in vitro performance as compared to Turbuhaler

- Provides better protection of the doses from moisture and temperature as compared to Turbuhaler (a multi dose DPI of M/S Astra Zeneca)
- Reduced critical and device-dependent errors vs. unit-dose DPIs.
- Rated higher by patients for ease of use, portability and comfort as compared to unit-dose DPIs.
- Preferred by patients over unit-dose DPIs.
- Reduced manipulation; hence useful even during emergencies
- Proven to be effective and safe in improving asthma control

5. With respect to the claim of the company, the Committee noted that the company has mentioned that it was awarded a special price towards incremental innovation for 'Synchro breathe inhaler device' (MDI) vide S.O. No. 4538(E) dated 18.12.2019 based on recommendation of 14th MDC meeting held on 04.12.2019. Accordingly, the company has now sought separate price for Ciphaler Inhaler device. The company however mentioned that 20% of price for incremental innovation is low and does not adequately cover the costs of the product. The company requested to grant a price of Rs.190-240 in addition to the DPI ceiling price, for the device containing-

(a) Formoterol Fumarate 6 mcg + Budesonide 200 mcg and

(b) Formoterol Fumarate 6 mcg + Budesonide 400 mcg

6. The Committee noted that the matter was placed in 59th meeting of MDC held on 08.05.2024, wherein the Committee directed to call the applicant in next meeting of MDC to explain the innovation claimed.

7. Accordingly, the representatives of the company appeared before the Committee and made a detailed presentation about their product i.e. 'Ciphaler' containing DPI 'Formoterol Fumarate 6mcg + Budesonide 200mcg/400mcg' and the two studies conducted by the company with respect to their product

8. The Committee deliberated upon the claim of the applicant based on the documents/ PPT/ study report furnished by the applicant. The Committee observed that although two studies undertaken by the company shows benefits of Ciphaler device, but the studies are not yet published in any Journal. The Committee also observed that the applicant has mentioned in the PPT that 'Ciphaler' is a 'drug device' combination.

9. The Committee noted that the applicant has furnished the drug approval by DCGI dated 7.03.2002 and 17.8.2001 and SLA license dated 17.05.2017. The license is provided only in respect of 'Formoterol Fumarate 6 mcg + Budesonide 200 mcg' and 'Formoterol Fumarate 6 mcg + Budesonide 400 mcg' and not in respect of the drug device combination as claimed in the PPT.

10. Accordingly, the Committee decided that clarification may be sought from CDSCO with respect to the licensing requirement of the drug device combination and their applicability to the 'Ciphaler' i.e whether the company is required to take a fresh approval of the Drug device combo from DCGI and State or the approval for drug only as provided by M/S Cipla would be applicable in the instant case.
